Textt and Textt Blog will be down while this maintenance.
Please save your text before the maintenance time.

Details about this update is below.

http://textt.net/update20110406_en.html

Sorry for your inconvenience.

New features! - bookmarklet and editor mode (beta).

We're exciting to announce the new Textt features - bookmarklet and editor mode(beta) has been launched.

Bookmarklet

Textt bookmarklet helps you to keep text on the web page.

Select text on the web page that you would like to keep and launch the bookmarklet. Then a edit form in a new window opens and you can save the selected text, page title, and URL.

<http://asset.textt.net/images/site/update2011042101en.png>

You can find and install the bookmarklet on the [Goodies] tab in the [settings] page.

Editor mode (beta)

Editor mode is a powerful tool to create or edit your text on Textt. To use the editor mode, click the [Editor mode(beta)] checkbox on the bottom of textarea. And the textarea will switch to the new editor.

<http://asset.textt.net/images/site/update2011042102en.png>

The editor mode has some features as like as the actual text editor (on the desktop), undo/redo, find, replace, full-screen mode, and so on. It's very helpful to write your text in full swing.

Enjoy!

Textt updates on 2011/07/18

* Added avatars for profile

To make individuality for profile, Textt supports avater settings.

You can use your favorite images as your avater image on the [Settings] - [Account] menu.

<http://asset.textt.net/images/site/update2011071801en.png>

Your avater shows on your profile page ([http://textt.net/\[Account Name\]](http://textt.net/[Account Name])).

A default image (Textt log) appears if no image is set.

* Changed screen size.

Textt's screen width is now fixed to improve the readability.

You can switch to the former flexbile width by clicking the toggle screen width button on the header.

<http://asset.textt.net/images/site/update2011071802en.png>

This setting is stored on your PC (as a cookie), and you need to switch this setting again if you use another machine.

* The menus on the header now appear as a drop down menu.

* The top page design before sign in is now improved.

* Fixed the problem that PDF is not generated correctly.
